

# TARIK GÜLEZGİN

SOFTWARE ENGINEER

## ABOUT ME

I am a passionate software engineer who enjoys overcoming challenges and developing products by producing innovative solutions. I have advanced knowledge in Python, intermediate knowledge in Java, beginner knowledge in C/C++/C# languages, and basic knowledge in JavaScript. I have advanced experience in HTML and CSS. I started my career in cybersecurity, then worked with embedded systems. I am currently working as an artificial intelligence engineer. In this process, I provide services such as WordPress-based web development, data scraping with BeautifulSoup, and project-based application development and support with Python as a freelancer. I aim to contribute to the world of technology by taking part in various projects.

## EXPERIENCE

### GOPA DANIŞMANLIK

*April 2025 - Present*

#### -Project Assistant

- Managing project tracking and reporting, coordinating meetings, and handling documentation and archiving processes.
- Supporting communication and stakeholder management, and assisting with budgeting and procurement activities.
- Conducting data analysis to support decision-making processes.
- Providing consultancy on IT infrastructure, website setup, server room installation, software requirements, and software procurement.

### FREELANCE

*February 2023 - Present*

#### -Web Scraper

- For Shipland Fulfillment, I developed and executed web scraping tasks to collect and analyze data from e-commerce platforms such as next.co.uk, Amazon, and AliExpress.
- I created detailed reports based on the extracted data to support business operations and decision-making.

#### -Web Developer

- Designed and developed websites for a law consultancy firm and a construction company by leveraging frontend development skills. Currently pursuing this field as a side business, actively building the market through self-driven initiatives.

#### -Software Consultant

- Providing support to professionals across various companies and institutions by addressing software-related inquiries and sharing technical expertise.

#### -Python Developer

- My primary expertise is in Python programming. I actively seek freelance opportunities on online platforms, focusing on development, code optimization, bug fixing, and project implementation using Python.

#### -Medical Representative

- I continue to work as a Medical Representative, a role I started as a part-time job during my university years. I facilitate service agreements between doctors and pharmaceutical companies such as Ashfield and Taymed, and coordinate contract negotiations with hospitals.

### BİGOEN

*September 2024 - March 2025*

#### -Artificial Intelligence Engineer

- As an Artificial Intelligence Engineer Intern, I developed algorithms for data analysis and worked on improving decision-making systems through various machine learning and AI projects.
- I worked with large international datasets on agricultural commodities and logistics pricing, and developed an AI-powered query system that eliminated the need for SQL queries. This project utilized AI agent technologies.

## BAŞARAN İLERİ TEKNOLOJİ ASELSAN NET BAYİ

August 2023 - October 2023

### -Image Processing Engineer Intern

- My second internship was at Başaran İleri Teknoloji, a branch of Aselsan located in Malatya. I worked in the telecommunications field and developed a small-scale image processing and facial recognition project, considering the operation of surveillance cameras. During this process, I gained experience not only in technical skills but also in communication and project management.

## TÜMER MÜHENDİSLİK

August 2022 - September 2022

### -Embedded Systems Engineer Intern

- My first internship experience took place at Tümer Engineering, located in Hacettepe Technopolis.
- I worked on an AHRS system project for avionics systems, specifically for UAVs, in the defense industry. This project was a challenging and technically complex process, but through this experience, I developed my problem-solving skills and gained a deeper understanding of the importance of teamwork.

## EDUCATION

### Bachelor's Degree / Firat University

Software Engineering

---

## LANGUAGES

Turkish (Native)

English (Intermediate - B1)

---

## EXPERTISE

Windows / Kali Linux

Python

Java

Arduino

C++/C#

HTML-CSS

JavaScript

Wordpress

AI/ML/LLM/NLP

TensorFlow

Scikit-Learn / Pytorch

Hugging face / Bert

OpenCV / YOLO

Numpy / Pandas

Matplotlib / Json

BeautifulSoup

SQL / NoSQL

MySQL / MongoDB

RAG / LangChain

BigData
